CASH BEDS

Sure, you could stuff your money under your mattress. But why not stuff it into a heavy-duty, built-in safe beneath your mattress?

Hollandia's new Safe-T Bed feature means a safe is installed out of view where you lay your head. The company charges \$399 to add it to their beds; one model, the Executive Safe-T Bed, comes with a flat-screen TV affixed to the foot of the bed and costs \$20,400.

Before the stock market plunged, a bed like this might make a person seem paranoid. Now, it seems oddly practical.
