

Neon Beds That Make You Say WOAH

Images: Steinreich Communications

Acclaimed designer Karim Rashid's has recently created 3 news beds for luxury bedding leader, Hollandia International. Marrying form and function, Rashid's inspired design entices the imagination with clean lines, creative materials and lots of high gloss. It also boasts modern must-haves like an iPod docking station, cabinet doors that swing out to create side tables and hidden storage drawers.

The Shell Bed

Thanks to its unique shell-shaped headboard design, this bed imparts a protective, cocoon-like feeling for the consumer lying inside the bed. To complete the bedroom look, also available is a matching makeup desk painted with the same high-gloss paint as The Shell Bed. Available in a variety of colors.

The Combi

This adjustable double bed features a high-gloss lacquer painted frame available in a large variety of color combinations. The headboard doubles as a desk with closable compartments, including a rolling shutter, to conceal everything inside it (your mess). The bed comes complete with an i-Pod docking station and massage system, which works the rhythm of the music in full synchronization.

The Glow Bed

Specially designed for those wanting a modern piece, as well as wanting to make others green with envy. With a high gloss, green finish, the Glow is a compact design featuring drawers for storage under the bed and in the headboard. Cabinet doors in the headboard also swing out to create side tables if needed. An iPod docking station installed in the bed allows you to listen to your favorite music while you charge your device.
