## Double-duty decor

You spend your life multi-tasking – shouldn't your home be just as versatile?

From a sofa that turns into a plush bed (with just a slight touch!), to a European-inspired couch with four adjustable sections (for sitting, lounging, sleeping and reclining) and a fun ottoman that converts to a bed (in a slew of colors/fabrics) – Hollandia International's new double duty line is designed to suit your life and style.

For a more affordable and eco-friendly option, there's the Natural futon by Gold Bond, designed specifically for the 'Greenest House in America.' The Natural is manufactured with 100-per-cent rubber wood – the most ecologically friendly wood in the world.
