

[3 New Contemporary Beds by Designer Karim Rashid](#)

I always look forward to design news on **contemporary beds**. Of course Karim Rashid is a household name in the design world so these models should not come as a shock to any design fans. Bright colors are a theme in these contemporary beds along with technology such as iPod docking stations. The product names are Shell, Combi, and Glow. The designs were made for Hollandia International and their website can be found [here](#).
